

Bird Feeders

Toilet roll bird feeders

I made these with my boys and we had great fun. I hope you do to enjoy.

What you need

Toilet roll (or you could just roll up some card)

Lard/ Peanut butter (if you have allergies lard also works just as well)

Bird seed

String and a stick

1. Using a knife spread the peanut butter or lard over your toilet roll.
2. Once it is all covered roll it through the bird seed until completely covered.
3. Thread a piece of string through to hang it. Alternatively you can put a stick through and attach the string to the stick to make a perch for the birds to sit on.

Alternatively you can use a plastic pot or part of a milk bottle.

1. Create a small window a quarter of the way up the pot, bottle.

2. Make holes on either side to attach string to hang up
3. Decorate however you want
4. Fill with bird seed and hang up

We have definitely noticed some more birds in our garden. Let me know how you get on.
